³ Annualized seven-day effective yield as of May 31, 2021.

Villere Equity Fund
Summary of Fair Value Exposure at May 31, 2021 (Unaudited)

The Villere Equity Fund (the "Fund") utilizes various methods to measure the fair value of its investments on a recurring basis. U.S. GAAP establishes a hierarchy that prioritizes inputs to valuation methods. The three levels of inputs are:

- Level 1 — Unadjusted quoted prices in active markets for identical assets or liabilities that the Fund has the ability to access.
- Level 2 — Observable inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment spreads, credit risk, yield curves, default rates and similar data.
- Level 3 — Unobservable inputs for the asset or liability, to the extent relevant observable inputs are not available, representing the Fund's own assumptions about the assumptions a market participant would use in valuing the asset or liability, and would be based on the best information available.

The following is a summary of the inputs used to value the Fund's investments as of May 31, 2021. See Schedule of Investments for industry breakouts:

Description	Investments				Total
	Measured at Net Asset Value	Level 1	Level 2	Level 3	
Common Stocks	\$ -	\$ 48,788,879	\$ -	\$ -	\$ 48,788,879
Short-Term Investments	-	3,680,623	-	-	3,680,623
Investments Purchased with Cash Proceeds from Securities Lending ¹	12,439,845	-	-	-	12,439,845
Total Investments in Securities	\$ 12,439,845	\$ 52,469,502	\$ -	\$ -	\$ 64,909,347

¹ Certain investments that are measured at fair value using the NAV per share (or its equivalent) as a practical expedient have not been characterized in the fair value hierarchy.
